Sukabumi City, Indonesia

Seventh-semester Computer Science student at Bina Nusantara University specializing in Data Science. Has a background in machine learning research, data analytics, and educational technology through projects involving healthcare prediction, educational inequality analysis, and STEM instruction. Passionate about using data and technology to create meaningful social impact, with strong analytical, communication, and teamwork skills developed through academic, teaching, and organizational experiences.

Education Level

Universitas Bina Nusantara - **Bandung, Indonesia** Jul 2023 - Present

Bachelor of Computer Science – Data Science Track, 3.84/4.00

- Achieved a GPA of 3.84 for semesters 1–6, co-authored a diabetes prediction research paper published in EMACS Journal, and conducted research on tomato leaf disease classification using CNN and Explainable AI for IGERS.
- Actively participated in KMK BINUS as a Master of Ceremony for student events and a member of the Logistics Division, developing communication, event coordination, and teamwork skills.

Work Experiences

Starlab Indonesia - **Bandung, Indonesia** Feb 2026 - Present

Coding Instructor

- Teach coding and robotics concepts to students through project-based learning activities.
- Guide students in developing problem-solving, computational thinking, and teamwork skills.
- Evaluate student progress and provide personalized learning support.

Bina Nusantara University - **Jakarta, Indonesia** Jul 2025 - Dec 2025

Machine Learning Researcher

- Conducted diabetes prediction research using Logistic Regression, K-Nearest Neighbors, and Naive Bayes, and developed a Stacking Ensemble model achieving 80.52% accuracy and 0.8604 ROC-AUC.
- Conducted tomato leaf disease classification research using ResNet50, MobileNetV2, and EfficientNet-B0, evaluating classification performance, computational efficiency, and model interpretability using Grad-CAM.

Kumon - **Sukabumi, Indonesia** Apr 2022 - Jun 2023

Mathematics Tutor

- Support students in mastering mathematics concepts through individualized learning approaches.
- Monitor student progress and provide feedback to improve academic performance.
- Develop communication and mentoring skills through interactions with students of different learning styles.

Organisational Experience

Komunitas Mahasiswa Katolik (KMK BINUS) - **Bandung, Indonesia** Feb 2024 - Feb 2025

Master of Ceremony & Logistics Division Member

- Served as Master of Ceremony during student events, facilitating event sessions and communicating information to participants.
- Supported logistics operations for social service events, coordinating event needs and helping ensure operational readiness.

Skills, Achievements & Other Experience

- **Technical Skills**: Python, SQL, R, Microsoft Excel
- **Data Analytics:** Data Preprocessing, Exploratory Data Analysis, Data Visualization, Statistical Analysis
- **Machine Learning**: Scikit-learn, Classification, Model Evaluation
- **Soft Skills**: Analytical Thinking, Problem-Solving, Communication, Collaboration, Attention to Detail
